## Suggestions and comments

---

Members of the public, political parties and other organisations are invited to make suggestions to the Redistribution Committee for the Australian Capital Territory on proposed electoral boundaries for ACT Legislative Assembly elections. The suggestions will be made public and comments on these suggestions are also invited.

### Making submissions

---

The Redistribution Committee will formally invite suggestions and comments on 5 February 2019. **Written suggestions** relating to the redistribution of the ACT Legislative Assembly electorates must be lodged with the Redistribution Committee on or before **4 March 2019**.

Copies of all suggestions received by the Committee will be available for public inspection at the office of the ACT Electoral Commission or from the Commission's website at **www.elections.act.gov.au** from **5 March 2019**.

**Written comments** relating to any suggestions must be lodged by **18 March 2019**.

Suggestions and comments should be lodged with the Redistribution Committee.

Online using a **graphical boundary mapping tool** at [www.elections.act.gov.au/redistribution](http://www.elections.act.gov.au/redistribution)

Or:

ACT Electoral Commission  
Ground Floor, North Building, Civic Square, London Circuit,  
CANBERRA ACT 2601

Postal Address: PO Box 272, CIVIC SQUARE ACT 2608  
Phone: (02) 6205 0033  
**Email:** [redistribution@act.gov.au](mailto:redistribution@act.gov.au)

It is important to note that these deadlines are set by legislation, and accordingly **late submissions will not be accepted**.

### More information

---

The ACT Electoral Commission is making available electoral enrolment information for use by interested persons and organisations. Statistics relating to current enrolment and projected enrolment at the time of the next election are at the end of this booklet and may be downloaded from the Commission's website.

Other information related to the redistribution can be obtained from the ACT Electoral Commission at the above address or from the Commission's website at [www.elections.act.gov.au](http://www.elections.act.gov.au)

## General information

---

### Why is a redistribution taking place?

---

The *Electoral Act 1992* provides that a redistribution of electorates for the ACT Legislative Assembly must begin as soon as practicable after the beginning of the period 2 years before the date of the next election. The next ACT Legislative Assembly election is due to be held on 17 October 2020.

### Who is on the Redistribution Committee?

---

The Redistribution Committee consists of the ACT Electoral Commissioner (Mr Damian Cantwell AM), the ACT Planning and Land Authority (Mr Ben Ponton), the ACT Surveyor-General (Mr Jeff Brown) and the Director of Demography, Australian Bureau of Statistics (Ms Beidar Cho). The Committee has the task of producing a proposed set of boundaries and names for electorates for the ACT Legislative Assembly.

### The redistribution process

---

The redistribution is carried out in accordance with the Electoral Act with several opportunities for public participation throughout the process.

#### Step 1 - Public suggestions

Before the Redistribution Committee makes its proposal, any interested persons or organisations who wish to make suggestions regarding the redistribution are given 28 days to lodge suggestions in writing with the Redistribution Committee. The Committee will formally invite public suggestions on 5 February 2019. Suggestions must be received by 4 March 2019.

#### Step 2 - Comments on the public suggestions

The public suggestions will be made available for public inspection from 5 March 2019 at the office of the ACT Electoral Commission and from the Commission's website. Any comments on the suggestions must be lodged in writing within 14 days. The closing date for comments is 18 March 2019.

#### Step 3 - The first proposed redistribution

The Redistribution Committee considers the public suggestions and comments before making the proposed redistribution. Maps showing the proposed boundaries and names of the electorates will be published in a newspaper and exhibited at the office of the ACT Electoral Commission and on the Commission's website.

#### Step 4 - Objections to the proposed redistribution

Following the publication of the first proposed redistribution there will be 28 days within which initial objections to the proposed redistribution may be lodged by members of the public or organisations.

#### Step 5 - Objections considered by the Augmented Electoral Commission

The objections are considered by the Augmented Electoral Commission. The Augmented Electoral Commission comprises the Chairperson of the ACT Electoral Commission and the other part-time Member of the Commission, sitting together with the members of the Redistribution Committee. The Augmented Electoral Commission may hold public hearings into objections.

## Step 6 - The second proposed redistribution

After it has considered all the initial objections lodged, the Augmented Electoral Commission makes a second proposed redistribution. If this second proposal is not significantly different from the first proposal, the second set of proposed boundaries will become the final boundaries for the ACT.

## Step 7 - Further objections

If the second proposal is significantly different from the proposal made by the Redistribution Committee, the Augmented Electoral Commission will invite further objections from members of the public or organisations. Further objections must be lodged within 28 days.

## Step 8 - Final determination

The Augmented Electoral Commission will then consider any further objections. The Augmented Electoral Commission may again hold public hearings into objections. Following its consideration of all objections, it will make a final determination of boundaries and names of electorates for the ACT.

## Legal requirements for a redistribution

---

In making its proposed distribution, the Redistribution Committee is bound by section 36 of the Electoral Act and section 67D of the Commonwealth *Australian Capital Territory (Self-Government) Act 1988*.

The Electoral Act provides that the Territory must be divided into five separate electorates with five members of the Legislative Assembly to be elected from each electorate.

The Self-Government Act sets out the following formula for calculating a quota:

$$\frac{\text{Number of Territory electors} \times \text{Number of electorate members}}{\text{Number of Territory members}}$$

In summary, the Electoral Act and the Self-Government Act provide that the Redistribution Committee and the Augmented Electoral Commission shall -

- (a) ensure that the number of electors in an electorate immediately after the redistribution is within the range of not greater than 110%, or less than 90% of the quota;
- (b) endeavour to ensure, as far as practicable, that the number of electors in an electorate at the time of the next general election of members of the Legislative Assembly will not be greater than 105%, or less than 95%, of the expected quota for the electorate at that time; and
- (c) duly consider -
  - (i) the community of interests within each proposed electorate, including economic, social and regional interests;
  - (ii) the means of communication and travel within each proposed electorate;
  - (iii) the physical features and area of each proposed electorate;
  - (iv) the boundaries of existing electorates; and
  - (v) the boundaries of divisions and sections fixed under the *Districts Act 2002*.

# Current and projected electoral enrolment statistics

---

The following statistics have been compiled for the 2018-19 redistribution of ACT electoral boundaries in preparation for the 2020 election for the ACT Legislative Assembly. The statistics are shown for localities, generally suburbs, in alphabetical order (Table 1), and according to the electorate in which that locality currently resides (Tables 2 to 6). The locality statistics are also available for viewing, listed according to the specific ACT 'district' in which the locality resides, from the *Current and projected electoral enrolment statistics* spreadsheet available from the 2019 redistribution web page at [www.elections.act.gov.au/electoral\\_boundaries/redistributions/2018-2019-redistribution](http://www.elections.act.gov.au/electoral_boundaries/redistributions/2018-2019-redistribution)

The enrolment projections are derived from population projections and from electoral enrolments as at 31 August 2018.

The enrolment information used by the ABS in calculating enrolment projections was supplied by the Australian Electoral Commission and was current as at 31 August 2018.

The compilation of these projections was undertaken by the ABS as a consultancy project for the ACT Electoral Commission.

## Methodology for the projections

---

The method employed for projecting the population for the ACT was the cohort-component method, widely accepted as the best way of producing age/sex population projections. Annual fertility rates, mortality rates, internal migration, and overseas migration by age and sex were applied to the base population to produce a projected population, which then became the base population for projecting the next year and so on. This cycle was repeated until the projection horizon was reached.

For each SA2 in the ACT, total population aged 18 years and over was projected using average historical growth rates and constrained to the total over-18 ACT population.

Complete process:

1. State projections. The ACT population at 30 June 2018-2021 was projected by age and sex, from a base (observed) population at 30 June 2017.
2. Statistical Area Level 2 projections. The total over-18 population of all SA2s in the ACT at 30 June was projected and constrained to the territory level.
3. Projected population at 31 August 2018 and 17 October 2020 calculated by linear interpolation between the projected populations at 30 June.
4. Projected population by SA2 was allocated to ACT localities via a population-weighted geographical correspondence.
5. The enrolled population at 17 October 2020, by locality, was calculated by applying a ratio to the total over-18 population. The ratio was the enrolled population at 31 August 2018 by suburb divided by the population projection at that date.

For the purposes of this redistribution the suburb of Kambah has been split along the north-south running Drakeford drive. To determine current and projected enrolment figures for Kambah this projection uses ERP by SA1

## SA1 methodology

1. Inputs: total estimated resident population, aged 18 and over, by SA1, at 30 June 2015, 2016 and 2017. The proportion of each SA1 population in relation to the total SA2 population of Kambah was calculated at each of these dates.
2. The average change in the proportions from 30 June 2015 to 30 June 2017 was used to create projected proportions at 31 Oct 2018 and 17 Oct 2020.
3. The projected SA2 populations at 31 Oct 2018 and 17 Oct 2020 were multiplied by the SA1 proportions at the respective dates, giving the projected population by SA1 at those dates.
4. The roll count at 31 Oct 2018, by SA1, was multiplied by the projected population, to give the enrolment ratio at that date.
5. The projected population at 17 Oct 2020, by SA1, was multiplied by the enrolment ratio, to create the projected enrolled population at that date. These counts were proportionally constrained to the total SA2 projected enrolled population.

## Assumptions

The base population for the ACT cohort-component projections was preliminary age/sex estimated resident population (ERP) as at 30 June 2017, as released by the ABS in *Australian Demographic Statistics* at [www.abs.gov.au/ausstats/abs@.nsf/mf/3101.0](http://www.abs.gov.au/ausstats/abs@.nsf/mf/3101.0)

Assumptions for the territory-level projection were based on both short and long-term trends for each component of population change. The ACT Government Treasury and Economic Development Directorate, responsible for planning and population forecasts, provided expert advice on the Territory's future demographic trends. This advice, combined with recently observed data up to 31 March 2018, formed the broad assumptions. These were the assumed total fertility rate, the standardised death rate, net overseas migration levels and net interstate migration levels. Fertility, mortality and migration assumptions by age and sex were based on those used in the latest *Population Projections, Australia, 2012 (base) -2101* (ABS cat. no. 3222.0).

Population component	2018 <sup>1</sup>	2019 <sup>1</sup>	2020 <sup>1</sup>	2021 <sup>1</sup>
<b>Fertility – total fertility rate</b>	1.75	1.75	1.75	1.75
<b>Mortality – standardised death rate</b>	4.7	4.6	4.6	4.6
<b>Net interstate migration – persons</b>	280	279	276	272
<b>Net overseas migration – persons</b>	4400	3885	3820	3715

Note 1: Year ending 30 June

SA2 population assumptions were average historical growth from 30 June 2015 to 30 June 2017. For new suburbs under development, population forecasts created by the ACT Government were used.

The ratio of enrolled population to total over-18 population at 31 August 2018 was assumed to be constant up to 17 October 2020, except for some outliers. New suburbs with very low ratios of roll count to population were given an increased ratio. Future suburbs with no current population were

given a ratio of 0.7, typical of new, similar suburbs. Some suburbs with declining population and a ratio greater than 1 were given a ratio equal to 1.

## Geography

---

The population projections were calculated using Australian Bureau of Statistics (ABS) projections relating to Statistical Area Level 2s (SA2s). SA2 boundaries are from the *Australian Statistical Geography Standard (ASGS): Volume 1 – Main Structure and Greater Capital City Statistical Areas, July 2016* (ABS cat. no. 1270.0.55.001), as used for the 2016 Census.

## Disclaimer

---

It is important to recognise that the projection results in this report reflect the assumptions made about future fertility, mortality and migration trends. While these assumptions are formulated on the basis of an objective assessment of historical demographic trends and their likely future dynamics, there can be no certainty that they will be realised.

The ABS takes responsibility for the method employed, however in accordance with ABS policy regarding small area population projections, the assumptions used are the final responsibility of the client, and the projections are not official ABS population statistics.

The projections may be referred to as "...projections prepared by the ABS according to assumptions reflecting prevailing trends agreed to by the Australian Capital Territory Electoral Commission".

No liability will be accepted by the ABS for any damages arising from decisions or actions based upon this population projection consultancy service.

Note 1: The above localities and enrolment figures have undergone minor adjustments to match the functionality of the online geographical mapping tool at [www.elections.act.gov.au/redistribution](http://www.elections.act.gov.au/redistribution). Where necessary and where the effect is likely to be negligible, the current and projected enrolment figures for certain low populated districts have been merged with adjacent districts or localities and the relevant district has been removed from the list. For instance (but not limited to), Booth district has been included in Tuggeranong District Remainder 2, Uriarra has been included in Coree district and Cotter River District has been included in Paddy's River District.
